■ Employment History

2012 - present HID
Wireframing, mockups and prototyping
User experience engineer

ArchSpine
Medical software
Designed entire online experience, including dashboards and portals for doctors, patients and technical staff. Localized the content and participated in front-end development

Zoccam
Real estate app
Created new on-boarding experience building upon the existing company image

IxoraHealth
Medical software
Designed UX for patient/doctor interaction app

Latch
Professional networking
Designed new website page, prototyped user dashboards and app. Front-end development

Nearchus
Restaurant recommendation
Created user experience of the assistant app

2000 - 2012 Apple Inc.
Fruits company
Siri Engineering
Principal engineer in charge of the French version of the popular assistant.
NLP code development, unit tests and builds

Usability lead engineer
Principal engineer for the user experience of localized operating systems and software

International Software Engineer
Responsible for the delivery of timely high quality localized Apple software products

1999 - 2000 MetaCreations Corp.
Graphics applications
International software engineer
Mac expert - Internationalization of all MetaCreations products for Mac and PC

1998-1999 Lionbridge
Software localization & globalization
International software engineer
Specialist in data conversion
Workflow simplification - Internal tools

1996 JVC Laboratories
Color imaging and processing software
Software engineer
Designed and implemented patentable electronic computerized ruler with a unique look and feel

1989-1995 Education Nationale - France
Free school for the masses
Physics & Chemistry teacher
Taught classes in Electronics, Computer Science, Classical Physics and Chemistry. Expert in computerized experiments

■ Education

1997 UCSC
Intensive English Course
TOEFL: Highest score in UCSC history

1991 Université Louis Pasteur - France
Teacher certification in Chemistry and Physics (C.A.P.E.S) - Master classes in Chemistry and Physics

1989 U.H.A - France
Licence de Chimie Physique
Diplomas and certification in Computer Science, Quantum Theory, Thermodynamics, etc.
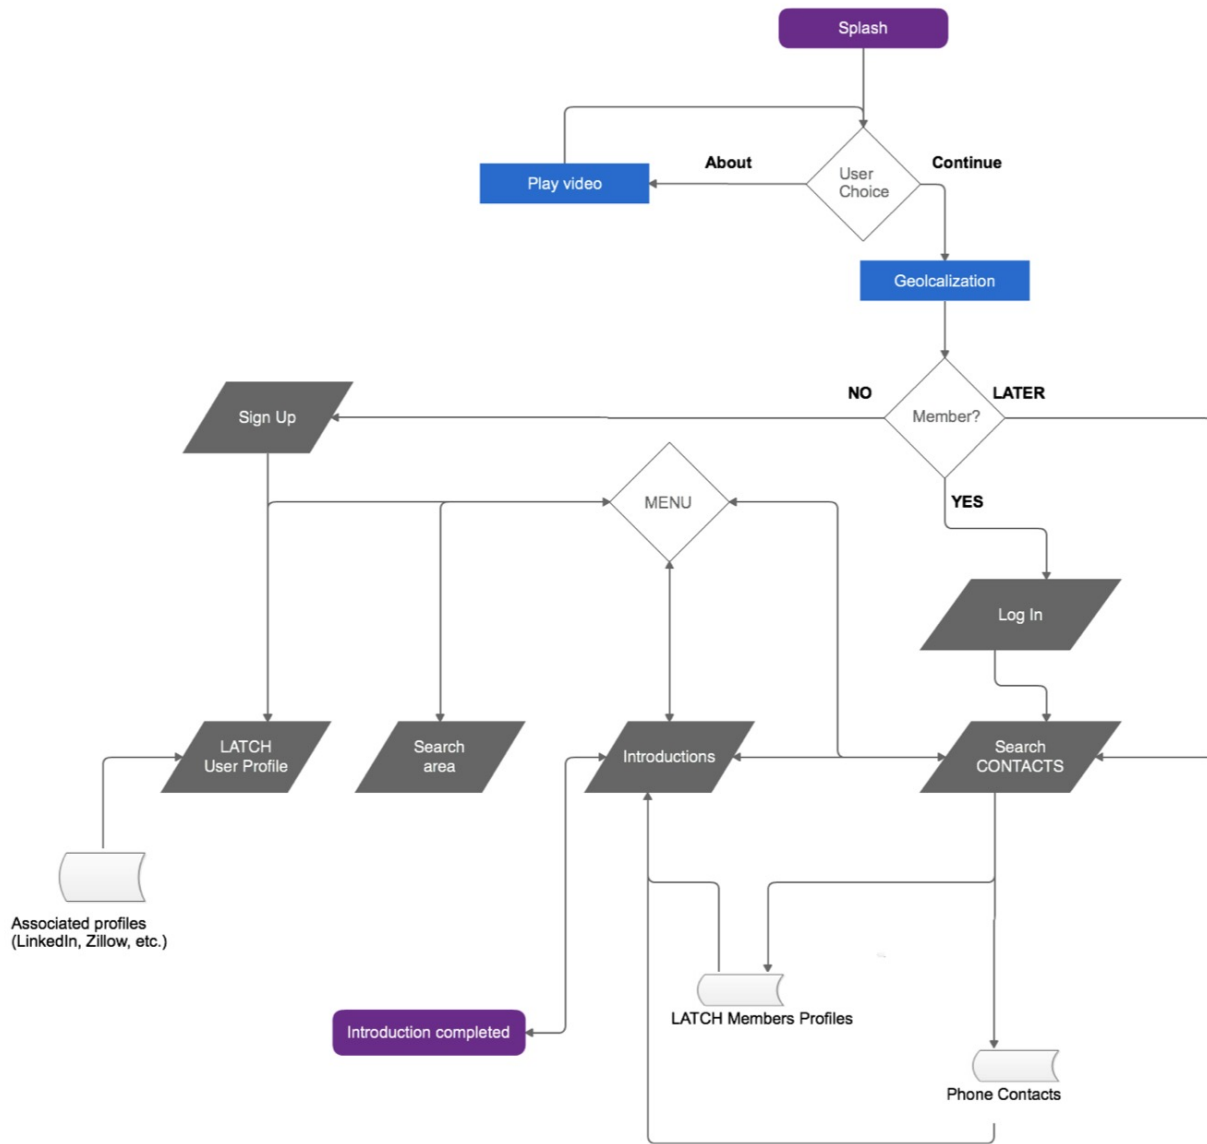

■ Languages

French: native speaker
English: fluent
German & Spanish: beginner

■ Art

• Fotoblur featured photographer 2012
•"Best Of Photography" 1994 Contest

Apple - Distribution of linguistic issues - Design and coding
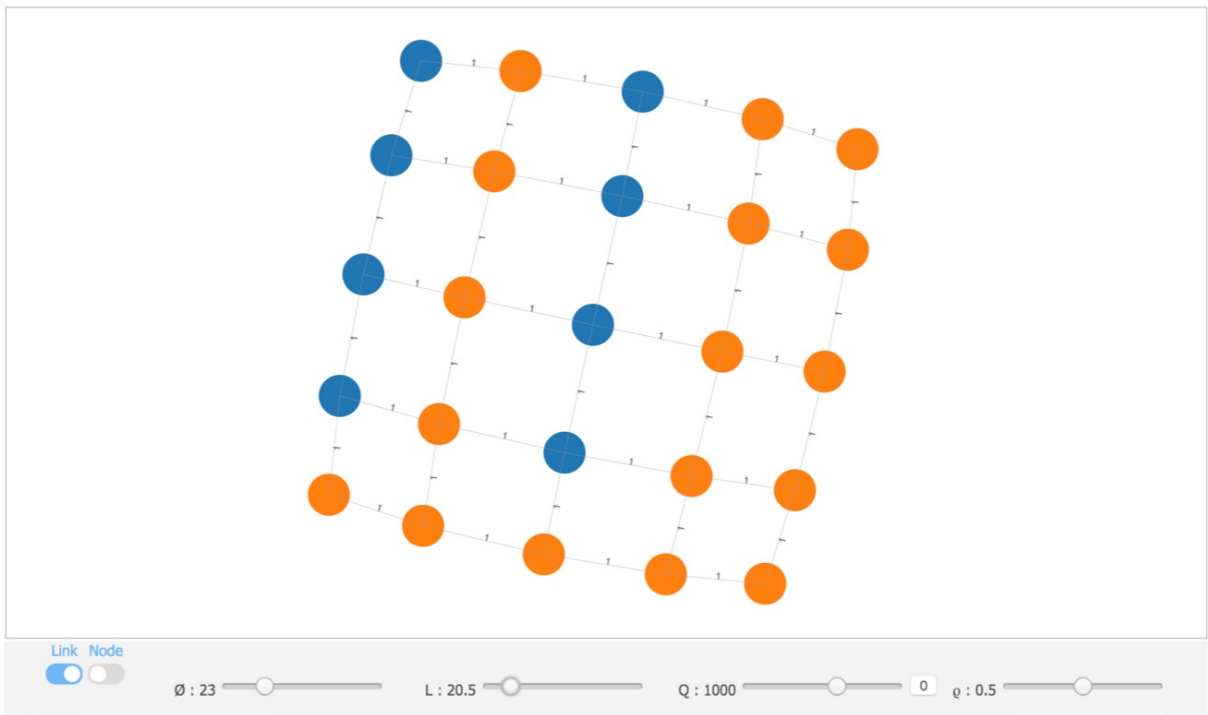

d3 data modeling - Design and coding

UX Design

7th Edition

Strengths Problem solver - Creative and analytical mind - Streamlines complex workflows and turns them into compelling user interfaces - Works well in teams and independently - Self driven - Detail oriented and thorough - Strong computer science background - Bilingual

Accomplishments Created an online software localization system from the ground up - Developed several intranets and authored hundreds of internal tools and scripts to support localization needs - Implemented a file compression engine with drag and drop interface - Conceived and wrote a 3D engine prototype for virtual reality software - Invented a draw ruler for JVC's Pixelens

"François designed and implemented an electronic scalable computerized ruler beyond the requirements of the project."
— Ken Ishi, JVC's general manager.

"I have found François exceptionally talented and professional. He is someone who introduces wise ideas and carries them through. Very responsive and quick to solid action. Additionally, he is personable and very pleasant to work with."
— Fredrik Stenshamn, Apple Inc.

François Schott programmed his first Apple II game at the age of 12. He joined the computer industry in the late 90s and started out by helping establish the Lionbridge office in California as a competitive player in the industry.

During his twelve years tenure at Apple Inc., François notably prototyped a ground-breaking application to enable online software localization. He was a key player in the success of Apple's assistant Siri in French.

François holds a BS in Physics and Chemistry from Université de Haute Alsace and has a BS equivalency in Computer science.
